ASKARI

2022 CEDIA Winner in Auto, Marine, or Aircraft categories across Asia Pacific
Bridger Automation proudly presents its Triple Award-Winning Integration Technology

**SUMMARY**

In the midst of the COVID-19 pandemic, Bridger Automation faced the challenge of designing and implementing an advanced automation system for the ASKARI yacht project. Despite the obstacles, Bridger Automation's innovative approach ensured the project's continuity and success.

OVERCOMING OBSTACLES

Despite facing obstacles, Bridger Automation's innovative approach ensured the project's continuity and success. Despite travel restrictions, the team devised plans and schedules remotely, facilitating seamless project progression. Equipment was directly freighted to the yacht building site overseas, enabling timely delivery despite logistical hurdles. Upon reaching Australia, Bridger Automation undertook the installation, which included a comprehensive automation system featuring RTI technology.

TAILORED AV SOLUTIONS

The audiovisual package comprised of fourteen zones across four decks, blending audio and video in ten zones, with the remaining four solely dedicated to audio, including specific areas like the master cabin and main salon equipped with soundbars and subwoofers, all managed through RTI control, ensuring a smooth sailing experience for the client despite the complexities.

Video zones all contain an RTI handheld remote and/or wall controllers, and phone/tablet app control.

Even amid challenges, the Integrator says that the process was smooth sailing...pun intended

FUTURE PROSPECTS

Delighted with the outcome, the client is now considering a similar system for their 31-metre super yacht, with key brands such as Araknis, iPort, and RTI playing pivotal roles in delivering a high-quality automation solution.

ADVANCED SECURITY AND INDUSTRY LEADERSHIP

Combining advanced security features with industry-leading technology, Bridger Automation's triple award-winning integration technology further solidifies its reputation as an industry leader in delivering cutting-edge automation solutions. Seven cameras strategically positioned throughout the exterior and main saloon provide comprehensive surveillance coverage, enhancing security and peace of mind for the yacht's occupants.
